Summary

Aspiring to join an organization that champions a culture of empowerment and initiative while aligning with the company's overarching vision. Aiming to contribute thoughtfully and actively to the achievement of organizational goals, fostering both company growth and personal development. Eager to play a pivotal role in shaping the organization's trajectory.

Work experience

Feb'23 – Nov'23 **EY GDS, Kolkata, India**

Associate Software Engineer

- Revamped web application security application minimizing hacker attacks from 2.3% to 0.02%
- Developed and maintained the front-end architecture for a critical project, focusing specifically on milestone summary pages that served as pivotal checkpoints for project progression.
- Conducted regular A/B testing and user feedback analysis, iterating on the UI/UX design to enhance usability and drive increased user interaction with milestone summary pages.
- Investigate and resolve software defects, identifying root causes and implementing effective solutions.

Associate Software Engineer Trainee

- Proficient in Java and Spring Boot, React and Angular, API integrations with expertise in front-end and back-end development, including RESTful APIs and MySQL database interactions.
- Skilled in Agile methodologies, seamlessly shifting between front-end and back-end tasks based on project needs, and effectively collaborating with diverse teams.
- Experienced in unit and integration testing, ensuring software quality and reliability.

Jan'22 – Apr'22 **Infosys, Mysore India**

Software Engineer Intern

Project - Online Health Buddy

- Received focused training on Java/UI/.Net equipping me with the skills to develop web applications.
- Successfully designed and developed "Online Health Buddy," a project that enables patients/users to conveniently book appointments online, enhancing accessibility to healthcare services.
- Designed and implemented intuitive and visually appealing user interfaces, ensuring seamless navigation and a user-friendly experience for health-conscious individuals.
- Application is designed using HTML, CSS, Angular, Java, Spring boot and RESTapi.
- Learned about Agile, which is a way of working together on projects. It helped the team to communicate better and make things step by step.

Project

Bank (Africa and Asia)

- Internet/Mobile banking is an application that enables user to access all the services which are provided by bank through online.
- Worked closely with the frontend developers to ensure seamless integration between the backend functionalities and the user interface, enabling a cohesive and responsive banking platform.
- Collaborated with the frontend team to contribute insights and guidelines for the user interface design, ensuring a user-friendly and intuitive banking experience.
- Developed Spring Controller classes for handling the request from the clients for multiple bank functionality (Funds transfer, checkbook request etc).

Food Ordering Application

Successfully delivered a functional food ordering application, streamlining the process for users to browse menus, place orders, and manage their carts effortlessly. The separation of backend (Java) and frontend (React) technologies ensured a scalable and maintainable architecture. As the developer, led the frontend development using React.js, collaborated with the backend team, and contributed to the overall architecture and functionality of the application.

Education

Aug'18 - May'22

Bachelor of Technology (CSE)

Punjabi University Patiala

- Achieved a cumulative score of 8.3 out of 10.

2018

CBSE

Lord Mahavira Jain Public School

Phagwara

Skills

Technical skills

HTML, CSS, JavaScript, Angular, React, Java, RESTapi, SQL, MongoDB, MySQL, GitHub, VS code, IntelliJ, Postman.

Soft Skills

Attention to Detail, Active Listening, Creative and Innovative, Excellent communication skills, Ability to perform individually as well as a team.

Certifications

- **Microsoft Azure Fundamentals – AZ 900.**
